

HYDRAULIC TANDEM PACKER

The Hydraulic Tandem Packer is designed for isolation of several zones for waterflood and remedial work. One or more may be run above or below a tension or compression set packer.

This Kline packer consists of a packing element system, a setting piston activated by tubing pressure, and a locking device that maintains pack-off after pressure differential is removed. Adjustable shear screws prevent premature setting.

TUBING	CASING WT.	GAGE RING OD	NOMINAL ID	CONNECTIONS
3 1/2	7.7-9.3	2.844	1.50	1.900 EU10Rd
4	9.5-11.0	3.281	1.62	2 3/8 EU8Rd
4 1/2	9.5-13.5	3.750	2.00	2 3/8 EU8Rd
5 1/2	14.0-20.0	4.641	2.00	2 3/8 EU8Rd
5 1/2	14.0-20.0	4.641	2.50	2 7/8 EU8Rd
7	32-38	5.75	2.50	2 7/8 EU8Rd
7	23-29	5.97	2.50	2 7/8 EU8Rd
7	17-26	6.08	2.50	2 7/8 EU8Rd
